

Editor's Note

This is the tenth volume of the International Journal for Educational Media and Technology, a collaborative work among scholars of Korean Association for Educational Information and Media (KAEIM) and Japan Association for Educational Media Studies (JAEMS).

This volume encloses a revised version of papers presented at the ICoME 2015 which was held in Shāndōng, China. There are seven refereed papers that reflect recent trends, perspectives and developments in educational media and technology in various settings.

We hope all these papers engage our readers to continue research and expand our dialogue as we explore issues in the area of educational media and technology.

We are grateful to all of our editors for their willingness to review the papers, and offer valuable comments.
