

Editor's Note

This is the ninth volume of the *International Journal for Educational Media and Technology*, a collaborative work among scholars of Japan Association for Educational Media Studies (JAEMS) and Korean Association for Educational Information and Media (KAEIM).

This volume encloses a revised version of papers presented at the ICoME 2014 which was held in Seoul, Korea. In this volume, we have an invited paper prepared by Professor Zoraini Wati Abas, who was the keynote speaker at the ICoME 2014. There are seven refereed papers that reflect recent trends, perspectives and developments in educational media and technology in various settings. This particular volume contains four non-refereed papers that received awards as best papers from the Round Table during the ICoME 2014. We hope all these papers engage our readers to continue research and expand our dialogue as we explore issues in the area of educational media and technology.

We are grateful to all of our editors for their willingness to review the papers, and offer valuable comments. We also thank Professor Kosuke Terashima for his efforts for this high quality journal.
