

International Conference for Media in Education

Advancing Learning Experience with Emerging Technologies

2018
Aug 16-19

First Call for Papers

Invitation

For decades, the International Conference for Media in Education (ICoME) has been the center to offer discussion and to conduct research in the form of media application for educational and training settings. We proudly invite you to attend ICoME and submit papers and innovative media applications, and also share your expertise via workshops.

This year's conference theme is to open the discussion of advancing learning experience with emerging technologies. Through the conference, we would like to collect ideas and research to lead our learners' experience forward for better learning. It could be relatively easy to introduce new media; but it is our primary mission to properly apply the technologies with pedagogical value. ICoME 2018 will bring you new perspectives to implement the newest technologies for learning and training.

Email: icode.submit@gmail.com

Chair of Organizing Committee: Dr. Jeeheon Ryu (jeeheon@jnu.ac.kr)
Chonnam National University, South Korea)

Keynote Speaker

- Dr. Michael H. Molenda
 - Dr. Michael H. Molenda taught in the Department of Instructional Systems Technology at Indiana University Bloomington, USA from 1972 to 2005. As an associate professor emeritus, he continues to do research and writing. He is co-author of the first five editions of Instructional Media and the New Technologies of Instruction and co-editor of AECT's 2008 definition book, Educational Technology: A Definition with Commentary (as well as being author or co-author of five chapters in the book). He has written numerous other encyclopedia articles on educational technology topics. He is currently preparing a book, The Elements of Instruction: Building Blocks of Lesson Design, for Taylor & Francis Publishers.

Important dates

- May 7: First call for submission
- May 16: Notification of first call
- June 1: Second call for submission
- June 10: Notification of second call
- July 1: Paper submission

Conference topics

- Emerging technologies for learning and teaching
- Innovations in educational reform and policy
- Advancing teacher education and educational training
- Online and distance learning for all
- Social network and digital communities
- Design theories and principles for educational media
- Others

Presentation categories

- Concurrent Presentation: 25~30 minutes
 - It requires 6~8-pages length for a full paper format. Applicants of this presentation should submit a one-page submission form. Some presentations may be considered to be published in the International Journal for Educational Media and Technology.
- Roundtable: 50-minute session
 - It requires 3-pages length for a full paper format. Each session includes multiples tables with audience. Professionals and students are encouraged to participate for dynamic discussion. Applicants of this presentation should submit a one-page submission form.
- Student poster: 2-hours session (Young scholar award will be given)
 - The presentation requires 2-pages length full paper format. Students are encouraged to participate to this session. This session requires a printed poster with research result for presentation. Collaborative research with a major professor are welcome, but a student should be a first author. Applicants of this presentation should submit a one-page submission form.
- Media festival: Showcase (Media developer award will be given)
 - New presentation category of ICoME – Students can participate with their own media application. They may apply for either a printed material or computer based format track. Team work is also recommended, but one person can apply for only one team. Applicants of media festival should submit a proposal application form. No paper submission is required.
